EPILEPSY
DIARY

SEIZURE TRACKER

SEIZURE TRACKER

Owner's name:

Name of pet:

Pet's date of birth:

Species: Dog ☐   Cat ☐

Breed:

Date of first seizure:

REMEMBER
the golden rules for
managing a seizure:

C STAY CALM

C CUSHION THE SURROUNDINGS

C CONTROL THE SITUATION*

*If the seizure doesn't stop within a couple of minutes, or if more seizures happen in quick succession, you should contact your vet immediately.

Notes on completing this diary

It is important to keep a seizure diary in order to monitor your pet's epilepsy and spot any patterns.

PAGES 2–37 contain seizure tables for you to complete:

Date: to determine the frequency of seizures and spot any change

Seizure type: generalised or focal
Time and duration: to spot any pattern and any changes.

Recovery: the time it takes your pet to recover is just as important as describing the seizure itself.

Tick the applicable box using the following colour codes:

- Very quick (1-15 minutes)
- Quick (15 minutes - 2 hours)
- Slow (2-24 hours)
- Very slow (1 or more days)

Comments: use this space to record any other information about the seizure or recovery that you think may be important (e.g. behaviour before and after the seizure).

Current treatments: to help you monitor your pet's medication.

↕ Record the time passed between two seizures.

PAGES 38–41 contain graphs to help you monitor the seizures over time.
PAGES 42–43 contain tables for tracking your pet's weight.

WEIGHT TRACKER

Epilepsy and anti-epileptic medication may have an effect on your pet's weight. It is important to keep your pet at a healthy weight.

WHAT TO DO DURING A SEIZURE?

C

STAY **CALM**

The seizure should not last long and should stop by itself. Your pet is not suffering.

C

CUSHION THE SURROUNDINGS

Make sure your pet can't hurt themselves. Keep any children and other pets away.

C

CONTROL THE SITUATION

If the seizure doesn't stop within a couple of minutes, or if more seizures happen in quick succession, you should contact your vet immediately.
